

IGEM - HKUSTers

Agenda of the 18th Meeting

Date: Aug 1, 2008

Time: 18:30 – 20:00

Venue: Room 5486

PIC: SHENG Qing

1. Main tasks of this meeting

- a. Discuss on the remaining problems in designing;
- b. Allocate the wet-lab work.

2. Notes by PIC

Hopefully the wet- lab work could be appropriately planed and the designing could be settled down.

3. Preparation before the meeting

- a. Read and think about the potential problems remaining in designing (use what mechanism to induce, recombination problem, control of cell growth, etc);
- b. Please be prepared for the progress and suggestions you are going to report.

4. Key items in the meeting

- a. [10min] Report on progress;
- b. [20min] Present the improvements on the design and the unsolved problems (if there is any);
- c. [30min] Free discussion and suggestions on the design and how can we conduct the lab work;
- d. [15min] Arrange testing work;
- e. [15min] Discussion on other issues (simulation, website, logo etc.).
